

13th International Junior Academy
August 10-12, 2023

Summary

Quality of the event

- *subjects and the presentations themselves were very appropriate for residents, good mixture between established know-how and our routine work. at the same time links to (possible future) research*

What was your overall impression of this event?

- *Everything was just perfect for me. Lectures+getting to know so many Histopath trainees around the world+city guided tour including the Beethoven Museum.*
- *Organisation, content*
- *Lectures*
- *lecture GI*
- *Lectures and talks that were useful for day-to-day life of junior trainees.*
- *Sharing experiences and socialising with other junior trainees in pathology*
- *Meeting so many international colleagues.*
- *The best lecture and explanation*
- *Very well-prepared lectures, perfect for a junior level. I personally very much enjoyed meeting trainees from different countries*
- *Great presentations*
- *exchange between participants and with speakers/heads of the event*
- *Quite good range of contents.*
- *I loved the approachability of the speakers! It was lovely to talk to them between sessions and have a more informal platform to engage with them.*
- *Hands on, practical tips how to think, interesting cases that visualizes the diagnostic work. Back to basics.*
- *Gastrointestinal pathology*
- *Beautiful case Clear explanation*
- *Diversity*

What was the worst aspect of this event?

- *Nothing really.*
- *Sometimes not enough time for the whole presentation*
- *Perhaps some of the talks could have been longer. For example, the GI Pathology was an excellent talk but it was a pity there was not more time to discuss the remaining slides*
- *None*
- *No such aspect*
- *None*
- *I loved that a shuttle service was available through! This was very convenient and much appreciated.*
- *At bit long presentations without a short break inserted. Sometimes the presentation was too fast, and it was hard to follow*
- *The time constraints: e.g. the extremely useful and informative presentation on Gastrointestinal Pathology could not be finished because the 2 hours allotted for it were not sufficient and the time ran out.*
- *No*
- *Short time*

Will the information you learnt be implemented in your practice?

- Especially the IHC lecture highlighted how wisely IHC stains should be used and the instances where genetic studies are essential.
- I now want to get a great understanding of our IHC controls
- Learning about macroscopic examination of laryngectomy specimens from an expert, and having a general perspective on how to use immunohistochemistry in the right way
- other look on gastrointestinal biopsies and diagnosis of lymphocytic rich gastritis
- The diagnostic process – assessing slides, when to re-sample, when to use immunohisto and I hope avoiding some pitfalls.
- Will definitely make use of the CUP IHC table provided by Prof. Hartmann.

How was your impression of the venue?

- The venue was perfect for this conference.
- Very modern and comfortable.
- very impressive
- hybrid course
- Adequate and charming
- so very fancy
- Online learning
- Nice
- Great
- easy access modern and comfortable
- It was great and truly beneficial to my daily practices.
- Very good! However, Internet reception was rather weak and I, for my part, could not connect to the Wi-Fi. This would be a lovely addition.

Do you have any suggestions for other topics at the event?

- Next time it would be great if you could include a case-based discussion on bone and soft tissue pathology.
- Dermatopathology
- Breast pathology
- No
- No
- Gynaecological pathology More lymphoma pathology and cases Skin pathology Renal pathology
- Neuropathology
- Urology could be great too.
- Dermatoses
- Molecular Pathology; Impact of the Artificial Intelligence Revolution on the field of Pathology
- N/A
