DEAR COLLEAGUES, DEAR FRIENDS,

It is our great pleasure to welcome you to the 3rd **Swiss Pathology Days and the 90th Annual Meeting of the Swiss Society of Pathology**. This milestone edition serves as a unique opportunity to reflect on our shared journey while looking ahead to the exciting future of pathology.

As our field continues to evolve with groundbreaking technologies and new diagnostic approaches, we also recognize the enduring importance of foundational knowledge, and the expertise passed down through generations. Which is why for this year, we are embracing the theme: **'Pathology in Transition'**

Once again, as in previous editions, Junior pathologists are proud to have been actively involved in the organization of this congress. We thank the **Swiss Society of Pathology (SSPath)** executive board, who keep showing their commitment to fostering the next generation of pathologists.

The **scientific program** has been carefully curated to engage both trainees and experienced specialists. We have invited not only nationally but also internationally renowned experts that will discuss a verity of topics, from **complicated H&E diagnoses of liver injury, pancreatobiliary lesions and IBD, to advancements in Salivary and Thyroid Cytopathology and Postmortem Diagnosis**. A shared session with the **Swiss Society of Molecular Pathology (SSMolPath)** and a special talk from an expert oncologist has been organized to tackle challenging, but relevant and

current subjects in molecular pathology and personalized patient management. Tailored more specifically to the younger pathologists, this year's Postgraduate Course and Slide Seminar will discuss **Nightmare Topics in Pathology made Simple**, having experts in their respective fields explain difficult topics and their approach to **Salivary Gland Tumors, cutaneous adnexal tumors, neuroendocrine neoplasms and Inflammatory Dermatopathology**.

Beyond the scientific sessions, we look forward to welcoming you to our **social events**, including the **Gala Dinner** and other informal gatherings—making opportunities to reconnect with colleagues and build new professional relationships in a warm and inspiring atmosphere.

With the stunning **cityscape of Zurich** and the facilities of the venue, we are confident that this congress will be both a memorable and enriching experience.

We look forward to seeing you and to an exciting exchange of ideas as we explore the future of pathology together!

With best regards,
On behalf of the organizing committee
